

Define your problem statement

This project aims at building a web App that automatically estimates nutritional value by classifying the input image of food. Our method employs Clarifai's Al-Driven Food Detection Model for accurate food identification. 5 minutes

PROBLEM

Difficult to predict the calorie of a food precisely.

PROBLEM

How this website can be able to survive in market? What are their sources of income? What are the promotion strategies?

Brainstorm

Write down any ideas that come to mind that address your problem statement.
